**In recent years, the renovation of the bathroom has become the primary renovation budget. The Italian shower has become the cornerstone of this piece. Long been trusted by Tileable SHOWER TRAYS, tile and masonry solutions. The low-profile SHOWER TRAYS have now set their dominance in the shower area and now offer many variations using the same materials (synthetic, natural stone, solid surface).**

We have developed a global concept of innovative low-profile SHOWER TRAYS.

The concept of our Swan collection is presented to you in this catalogue with a range of trendy materials, innovative products on the market, and finished products:

- Shower Trays - Low Profile with Square Grid or Channel Grid
- Wall Cladding Panels
- Corner Shelves
- Mosaics in Large Roll Format (see our Rozzo Catalogue)
- Radiators and Heated towel rails - [www.cosy-art.fr](http://www.cosy-art.fr)

**These products are available in many finishes and colours, to allow everyone to find the ideal product for their bathroom.**

# SWAN

Art of bathroom

The SWAN collection is composed of several trendy materials and colours deployed according to three major items:

## 1 TRAYS

— Low Profile Shower Trays you will discover for all ranges with a square grid finish or a channel grate finish. Many formats available. Customized also.

## 2 WALL CLADDING PANELS

— Wall Cladding Panels which allow for wall covering in renovation (ideal on old tiling) or in new for recessed faucets. These panels with a thickness of 1cm will be ideal – offering a harmonious set that removes most of the unsightly joints of traditional tiling.

## 3 SHELVES

— The corner shelves that fit in all corners of the bathroom, with discretion and elegance. Resistant up to 7 kg, these shelves are the perfect alternative to the old-fashioned baskets that adorn most bathrooms.

# BATHROOM RENOVATION

WITH THE PRODUCTS FROM THE

# SWAN

COLLECTION

< BEFORE

## EXAMPLE OF RENOVATION FROM OUR SWAN CONCEPT.

Renovation of a bathroom of the 70s into modern designer bathroom. We have integrated in this renovation all products in the range:

- Low profile tray in stone resin
- Panel of stone resin
- Natural stone corner shelf
- Mosaic 5 x 5 cm in large roll format on the shower wall
- Cozy-Art Towel in Cement Tileable Mosaic

AFTER >

## WATERPROOF MAT —

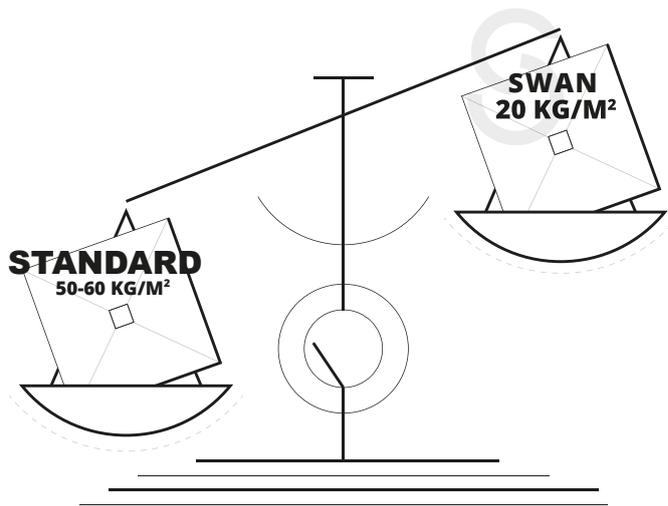

Our SHOWER TRAYS are equipped with a waterproof mat bonded with the trap and glued under the tray. This mat provides a wall lift in addition to a peripheral seal, thus ensuring the waterproofing of the installation.

## ANTI-SLIP —

All our SHOWER TRAYS are Anti-Slip. However, depending on your requirements, we can change the slip criteria from PN12 to PN18 or PN24. The option is applicable after the laying of the tray.

TYPE OF PRODUCT	CLASSIFICATION ANTI-SLIP
<b>SHOWER TRAYS IN RESIN STONE GRAPHITE / SLATE / LEATHER</b>	CLASS C (Equivalent PN24)
<b>SHOWER TRAYS IN NATURAL STONESTONE</b>	CLASS C (Equivalent PN24)
<b>SHOWER TRAYS IN SOLID SURFACE SMOOTH</b>	CLASS A (Equivalent PN12)

## LIGHT WEIGHT —

### ONLY 20 KG/M<sup>2</sup>

The composition of our products is made up of a solid topping with an excellent insulator that allows good product dilation when installed and also better insulation of the shower space. The lighter weight is achieved whilst remaining very robust. This makes it easy to transport and install.

## RESISTANCE — to chemicals

The treatment product applied to our products give the SHOWER TRAYS a significant resistance to chemicals and abrasion. Nevertheless, we recommend avoiding abrasive sponges and prefer soft bristles.

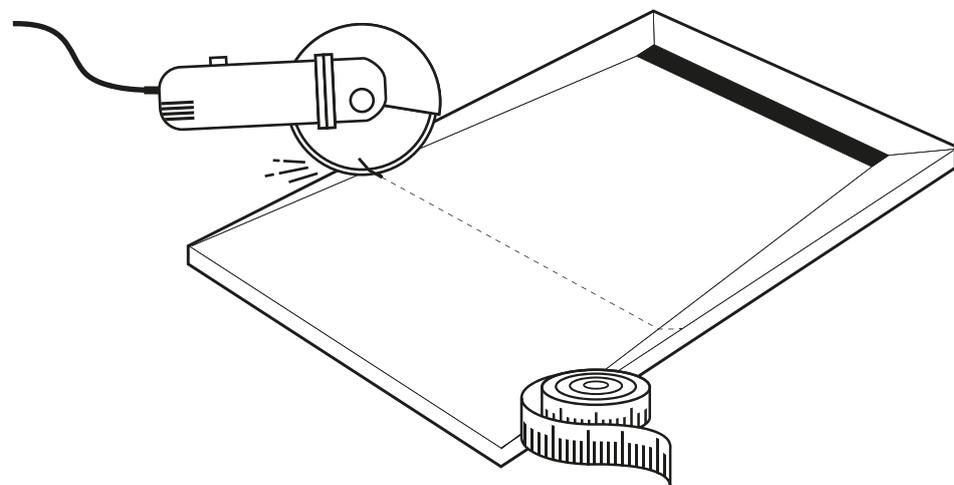

TYPE OF PRODUCT	EXPOSURE TIME	RESULT
WHITE SPIRIT	16 HOURS	NO CHANGE
CITRIC ACID		
URIC ACID		
ACETONE		
BLEACH		
WHITE VINEGAR		
LIMESCALE		
ALCOHOL at 90%		
AMMONIA		

## CUT TO SIZE —

All our SHOWER TRAYS are cuttable with a diamond disc cutter.

We can also deliver the bespoke trays (option) with an additional delay of 4 - 8 weeks.

**Don't hesitate to consult us!**

# MATERIALS —

**We offer 5 materials that will bring mineral, modern and design touches to your bathroom**

- **NATURAL STONE**, our best-known innovation in the past 4 years. A true mineral and unique product, it will integrate in both a designer and traditional bathroom to create a break with the rest of the bathroom
- **SOLID SURFACE SMOOTH WHITE**, A true work of art that is pure and contemporary, it will be integrated into the most successful projects at the architectural level. Either melted in a totally white atmosphere, or in contrast to a room with more colorful tones
- **RESIN STONE**, Stone Graphite, Slate, Leather... Many finishes that will allow everyone to find a designer product in line with their project.

**VERTICAL PANELS**

Our cladding panels can be installed vertically (200 to 280 cm in height) and possibly installed in addition to a mosaic or installed horizontally to increase the impression of depth in the shower.

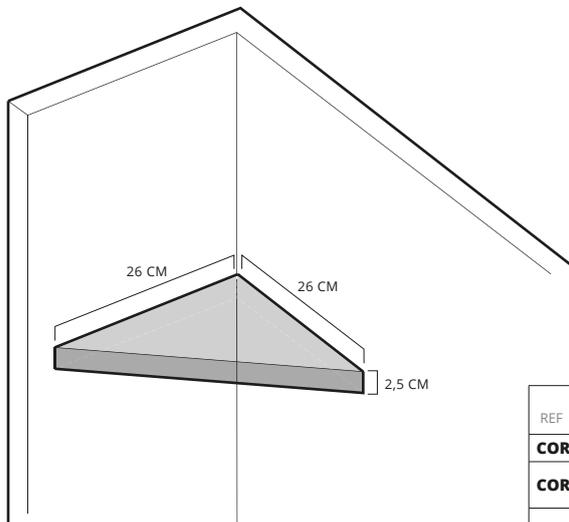

**HORIZONTAL PANELS**

# SHELVES —

What's uglier than a stainless steel or plastic basket in a stylish bathroom. Indulge yourself by a finished product with hidden fixations. Our corner shelves are available in slice stone, a natural stone finish (6 colours), or Marmoxite finish, a patented resin bound synthetic stone moulded into a natural stone effect (5 colours).

# WASTES —

## EVACUATION: THREE PRODUCTS TO CHOOSE FROM

The traps are all offered in 40mm diameter (Glue or compression). The choice of our wastes was based on those designed by our partner WIRQUIN. Flow is at the center of the requirements, as is the ease of connection and installation and Wirquin innovations with the JAMES (Vertical or Horizontal Orientable) and the 4 cm ultra-flat SLIM waste perfectly meet these requirements.

**°360 or ultra-flat, the assurance of finding the ideal waste for your construction constraints.**

1 SLIM square waste | 2 Slim Channel | 3 James 360 Waste

# COLOUR CHART

Natural STONE is, as the name suggests, a natural element. This feature gives the material and the finished product a unique look, with surface irregularities and shades specific to each tray.

Tones that will create a unique atmosphere in your bathroom. It must be protected and maintained with suitable products. We can offer other finishes on request.
